

# Colour Sort!

**Colour sort play is a fun activity for  
Toddlers & Preschoolers!**

## **Materials Needed:**

- ✓ 3 Baskets or Buckets
- ✓ Toys in three different colours

**Directions:** Display an assortment of toys in the three different colours in the baskets. Encourage your child to find more toys throughout your home that match the colours that are represented. Extend their play by having them sort their items by colour and by size in their baskets. Have your child count the toys - which colour has the most and the least. Introduce patterning with the colours and sizes.

**Learning Value:** This activity develops your child's math and observation skills. Comparing and categorizing items encourages your child's cognitive thinking.
