

# Giant Outdoor Memory Game

Your child will love playing this fun large scale memory game indoors or out!

## Materials Needed:

-  Paper Plates
-  Markers

**Directions:** Create a large scale memory game using paper plates as the 'memory cards'. Draw and colour a shape, letter or picture in the middle of the inside of each paper plate. Create two of the same to make pairs for matching. Once you have a number of matches, mix them up and lay them out with the picture side down. Encourage your child to see if they can make matches and work on their memory skills as they play.

**Learning Value:** This memory activity develops your child's concentration skills and aids in their overall attention to detail and focus.
