

Green Pea Sensory Fun!

Green pea sensory play is a fun messy activity for Infant & Toddlers!

Materials Needed:

- Frozen Green Peas
- Warm Water
- Shallow Sensory Bin

Directions: Place a small bag of frozen green peas into a large sensory bin together with a few small bowls and spoons for scooping. While your child plays the peas will begin to thaw and become 'mushy'. For a different experience, add warm water to the bin so that your little one can watch and explore as the peas roll around and float.

Learning Value: This activity develops your child's touch sensory processing skills as well as their language. This activity is also a great fine motor workout!
