

Recipe for

Edible Sand

FROM THE KITCHEN OF
Kids & Company

INGREDIENTS/SUPPLIES
NEEDED

Cherrios

High Speed Blender

Shallow Container

Sand Toys

DIRECTIONS

To create this 'tasty' activity simply place 2-3 cups of Cherrios into a high speed blender and pulverize it to sand consistency. Place the taste-safe sand into a shallow sensory bin and add scooping items as well as a few sand molds. Your child will enjoy playing with this yummy sand indoors or out.

You can feel confident that if your child tries a few samples it is completely safe!
