

Salad Spinner Activities

One simple item = endless learning opportunities!

Spin Art - Place a paper plate or craft paper cut to size in the bottom of the spinner. Add a variety of paint colours and start spinning. The paint will fly around inside the device and the end product has an amazing visual effect!

3D Creations - Supply your child with pipe cleaners or dried spaghetti to push into the spinner's interior. This activity allows your child to create designs while strengthening their fine motor skills.

Colour Fun - Add colourful pouch lids, scarves or lego to your salad spinner for your child to watch as the colours spin and blur together. This activity will provide your child with a fun sensory experience.

Egg Dye - Hard boil eggs for your child to mix, spin and dye eggs. This activity will provide an opportunity for your child to learn the changes of colours as they mix.

Bubble Fun - Pour a small amount of bubble bath and water into your spinner. Encourage your child to spin, mix, observe and play with the bubbly fun!

Marbled Objects - Add nature items like pine cones, acorns or rocks to your spinner. Allow your child to add a variety of paint drops with an eye dropper and spin. Your child can observe the changes, add more colours and spin until there is a desired result.
